

PHILIPS

VoiceTracer

Speech Recognition Software

For Philips audio recorders

Automatic transcription of your recordings

Up to 3 times faster than typing

Up to 99 % recognition accuracy

For Microsoft Windows

DVT2805

Stop typing, start speaking

Turn your recordings into text quickly, easily and accurately with the Philips VoiceTracer Speech Recognition Software. Save hours of tedious typing by automatically turning your audio recordings into written text. Simply record using your VoiceTracer and let the software do the typing for you!

Turn your voice into text

- Speech recognition software eliminates the need to type up documents
- Automatically transcribe your recordings, up to three times faster than typing
- Software works with all current Philips VoiceTracer audio recorders

Accurate results

- Exceptional transcription accuracy rate of up to 99 %
- Software continues to learn to improve speech recognition accuracy

No 1 in SPS global customer satisfaction survey 09/2017.

Highlights

Speech recognition software

Put an end to tedious typing and create text documents directly from recorded audio files. The speech recognition software automatically converts your recordings into a text file.

Exceptional accuracy

The speech recognition software provides an astounding accuracy rate of up to 99 %. It also never misspells a word, so typos are a thing of the past.

Automatic transcription

Using the speech recognition software is at least three times quicker than typing up the document yourself. Simply record your documents and notes, connect the recorder to the computer, click the 'Transcribe' button and the software does the typing for you.

A software which learns

The smart algorithm learns from corrections you make to the transcribed text. This means the more you use the software, the more accurate your results become. The software also memorizes patterns, and commonly grouped words when you speak, to predict which words are most likely to occur. This acts as an extra boost to your speech recognition accuracy.

Works with Philips VoiceTracer

Transcribe any recordings you create with your Philips audio recorder automatically into text. The software is compatible with all current Philips VoiceTracer models.

Specifications

System requirements

Operating system: Windows 10, 8.1, 8, 7 (32-bit and 64-bit), Windows Server 2016/2012/2008 R2

Processor: Intel dual core or equivalent AMD, 2.2 GHz or later

RAM memory: 2 GB (32-bit)/4 GB (64-bit)

Hard disk space: 4 GB

Sound card: capable of supporting 22 kHz 16-bit recording

USB: free USB port

Internet connection for download and activation
